\$10,000
FOR GAS CUSTOMERS**

ELECTRIFY YOUR HOME!

Convert your heating system from natural gas to an electric air source heat pump. Since air source heat pumps are powered by electricity, they produce far fewer emissions than gas systems and are more cost-effective.

West Boylston Municipal Light Plant (WBMLP) customers with Eversource Gas are eligible for a rebate of up to \$10,000 for converting their full heating system to a heat pump system or up to \$1,250 for installing a partial home heat pump system.

WBMLP customers can also receive a free Heat Pump Assessment through NextZero and may qualify for an additional \$250-\$500 heat pump rebate from WBMLP.

HEAT PUMP REBATE PROCESS

- 1** Schedule an energy assessment through Mass Save at [MassSave.com](https://www.masssave.com) or 1-866-527- SAVE (7283).
- 2** Complete weatherization recommendations made by Mass Save.
- 3** Check [NextZero.org/West-Boylston](https://www.nextzero.org/West-Boylston) and [MassSave.com](https://www.masssave.com) for additional rebates.
- 4** Schedule an Air Source Heat Pump assessment through NextZero by calling 1- 888-333-7525.
- 5** Get quotes from qualified contractors listed online at [MassSave.com](https://www.masssave.com).
- 6** Consider a 0% interest Heat Pump loan of up to \$25,000 from Mass Save.
